Watercraft Users : On January 1st, 2001, the State of Alaska, Division of Motor Vehicles assumed the boat registration program from the U.S. Coast Guard. House Bill 108, passed in the 2000 legislative session, authorized this registration program and a comprehensive boating safety program. Prior to January 1st, 2001, the Coast Guard registered powered boats that are used on navigable waterways of the state. These registrations are valid for three years and a Certificate of Number issued by the USCG will still be valid until the expiration date, unless the boat changes ownership. When the USCG issued registration expires or when the ownership changes, boat owners must renew the registration with DMV.

6 of 8

What Must Be Registered:

The USCG registered only powered boats used on navigable waterways, however, the state law requires the following to be registered:

- All powered boats (including non-powered boats with auxiliary power units) used on any water of the state. (This includes all rivers, streams, and lakes, regardless of size, and all salt water within 3 miles of land.)
- Non-powered boats 10 feet or greater in length when used on any water of the state.

NOTE: The use of Personal Watercraft and Airboats are prohibited for commercial purposes in the National Park Units.

A **Personal Watercraft** is defined as a vessel which uses an inboard motor powering a water jet pump as the primary source of motive power, and which is designed to be operated by a person sitting, standing, or kneeling on the vessel, rather than the conventional manner of sitting or standing inside the vessel. The jet pump works by drawing water into the housing ahead of the impeller. The impeller is a type of precision propeller contained within the housing that pressurizes the water as it enters and forces the water toward the stern of the craft. The force of this exiting water is what pushes the PWC in the opposite direction. PWC do not have exposed propellers like most other powerboats. Brand names include, but are not limited to, Jet Ski, Sea-Doo, Waverunner, Wet Jet and Surf Jet.

An **Airboat** is defined as a self propelled vehicle that depends solely upon air thrust without air cushion to move in any direction across land, vegetation, water, ice and combinations of conditions associated with buoyancy. Typically greater than 12 feet long.

19) Will you be using *any type* of **WATERCRAFT** within park boundaries in your operation _____?
